

# CRAFTED FOR CONFIDENCE

## OUR STORY

A family-owned and operated company, CORTEC began operation in January of 2004 with a group of experienced, like minded professionals with a passion for manufacturing and selling a product backed by an unmatched level of quality and service.

CORTEC is a business built on lifelong relationships and a dedication to providing a product guaranteed to exceed client needs. We're committed to supplying your flow-control needs today and continually aspiring to produce equipment capable of the needs of tomorrow.

**AMERICAN MADE. SUPERIOR GRADE.**

CORTEC proudly operates two US based manufacturing facilities in Louisiana.

208 Equity Boulevard, Houma, LA 70360

## OUR MISSION

*Out Perform and Over Deliver.* Our aim on every project is to continually exceed client expectations by delivering the highest quality products backed by superior support. We pursue this ideal with safety at the forefront and an uncompromising emphasis of quality based the most stringent of industry and CORTEC inspired standards. CORTEC is an engineered products company dedicated to providing solutions and bringing value to every project.

## OUR CULTURE

CORTEC is comprised of two globally established divisions with their own unique product focus.

CORTEC Fluid Control (CFC) leads the choke industry by offering the most expansive line of models across both production and drilling applications. Additionally, we offer a full line of pressure relief valves, API flow line components, manifold packages and control panels to compliant our valve offerings.

CORTEC Manifold Systems (CMS) is an industry leading manufacturer of compact valves. Our designs, including ball, check and diverter type valves, are crafted to maximize weight and space savings potential when compared to conventional API and ANSI class designs. We utilize our vast manifold and piping systems design experience to deliver turnkey systems that match the precise needs of our client.

## OUR BUSINESS LINES

**CORTEC Fluid Control (CFC)** leads the choke industry by offering a complete line of production and drilling chokes. We complete our line of products with pressure relief valves, API flow line components and valve manifold packages for total fluid control.

**CORTEC Manifold Systems (CMS)** has steadily become a dominant presence in the compact valve world by offering an extensive line of compact ball, check and diverter valves. Crafted at our Louisiana production facility, our compact valves provide significant weight and space savings, perfect for both in both offshore and on-land manifold design applications. CMS also offers a line of drilling diverter valves and complete turnkey valve manifold packages to fully service client needs.

## OUR APPLICATIONS

### (SECTORS WE SERVE)

CORTEC manufactures a range of equipment well suited to virtually any high pressure, upstream application. Contact our team today or visit our website to find out more on how we can serve your project needs.

- PRODUCTION
- DRILLING
- WELL SERVICES

## OUR PRODUCTS

Our product lines include:

- Production Chokes
- Drilling/Extreme Service Chokes
- Compact Valves
- Pressure Relief Valves
- API Flowline Components
- Control Panels
- Valve Manifold Packages

We believe product support is paramount to developing the confidence of our customers. CORTEC stands 100% behind our products and we aim to continuously pursue complete satisfaction with their use.
